

**MRES.A.01 Research Methodology - Scientific Writing  
Assessment Process**

1. Within the first three weeks of lectures of the course, all students are expected to discuss with their supervisors and provide a tentative title for the sample regular paper or the sample short review paper that they are going to write-up for the final evaluation.
  - a. Student is free to select paper subject. However, the subject is usually related to the student's research project topic.
  - b. Information required: student's name, supervisor's name, article type, tentative title of the article.
  - c. The information has to be provided by the supervisor, to assure supervisor's consent.
2. Upon completion of the lectures, all students have to submit their article accompanied by a cover letter and a 10-minutes power-point presentation.
3. Within one week from the article submission deadline, all students are invited to review an article written by one of their fellow-students (with review report deadline is one week from the invitation). Additionally, the presentation schedule is publicly announced.
4. Presentations are conducted in presence of all students, as well as any other interested students / professors, time for questions to the presenter is provided.
5. Each student receives by email the review report for his/her article.
6. Grades are announced along with a specific date/time for private discussion on their grading details.
